UNIVERSIDAD DE GRANADA

Departamento de Ingeniería de la Construcción y Proyectos de Ingeniería

EATA 2019 - Organizada por LabIC - Universidad de Granada

08/04/2019

The University of Granada (Spain) will host the 8th European Asphalt Technology Association Conference, that will take place between the 3 and 5th of June in Escuela Técnica Superior de Ingenieros de Caminos, Canales y Puertos.

Organization June, 03 - 05, 2019, the conference will be organized by LabIC.UGR research group from the University of Granada, Spain.

Organizing committee

- María del Carmen Rubio-Gámez - LabIC.UGR, Granada, Spain
- Fernando Moreno-Navarro; Chair; LabIC.UGR , Granada, Spain
- Hervé di Benedetto; Chair; University of Lyon, France

EATA, the European Asphalt Technology Association, is an organisation of European engineers and scientists involved in Asphalt Technology Research. They hold a technical meeting every two or three years and publish a volume of the papers which are presented and discussed. Attendance is open to anyone with an interest in the field from around the world.

EATA was founded at the University of Nottingham in 2004, it can trace its origins there back to 1973 at the University of Nottingham where a group of people with an interest in new developments in flexible pavement engineering met to hold informal discussions about their work, focussing, particularly, on new ideas and developments. They agreed to meet annually thereafter and to do so inspired by the activities of the Association of Asphalt Paving Technologists in the USA that was
