UNIVERSIDAD DE GRANADA

Departamento de Ingeniería de la Construcción y Proyectos de Ingeniería

The 8th EATA meeting is scheduled for June 3rd–5th 2019 in Granada, Spain.

23/06/2017

The European Asphalt Technology Association, is an informal organisation of European engineers and scientists involved in Asphalt Technology Research. They hold a technical meeting every two or three years and publish a volume of the papers which are presented and discussed.

Attendance is open to anyone with an interest in the field from around the world. EATA was founded at the University of Nottingham in 2004, can trace its origins there back to 1973 and was inspired by the activities of the Association of Asphalt Paving Technologists in the USA that was formed in 1924.

The last EATA meeting has been in Zurich and the next one will be on **June 3rd–5th, 2019, in the ETSICCP, Granada, Spain, hosting by LabIC**.

Conference Topics

- Durability and aging of binders and asphalt mixtures
- New mixtures and mixture components
- Modelling and testing
- Asphalt mixture design, modelling and testing
- Environmental aspects
- Asphalt recycling
- Advances in construction and asphalt production technologies
- Structural design
- Innovative asphalt pavements
- Damage, aging and performance of pavements
- Pavement rehabilitation
